

MATHEW KEROLLOS ABD EL MALIK

Mechatronics Engineer

+201200232345 | Alf Mskn–Gesr Sues , Cairo, Egypt | [LinkedIn](#) | mathewkerollos777@gmail.com

SUMMARY:

A detail-oriented Mechatronics Engineer with a strong foundation in automotive systems, embedded systems, and mechanical engineering. Equipped with hands-on experience from industry-relevant training programs, including Automotive Summer Training, Embedded Systems, and Engine Mechanical Basics. Proficient in integrating mechanical, electronic, and software components to develop innovative solutions. Committed to continuous learning and skill development, with certifications in English proficiency and technical courses to support professional growth in the engineering field.

EDUCATION:

Higher Technology Institute – 10th of Ramadan City | 2018 - 2023

Bachelor of Mechatronics - Mechanical Engineering

Location: Cairo, Egypt

GPA: 2.93 (Very Good)

WORK EXPERIENCE:

Trainee | NTI | Cairo, Egypt | PCB Design Track | Feb 2025 – Present

Xerox Company | Asyut, Egypt | Maintenance Engineer | Jan 2024 – Nov 2024

- Perform routine and preventive maintenance on X-ray printing devices
- Diagnose and repair technical issues in printing devices, improving equipment reliability and operational efficiency.
- Collaborate with hospital staff to identify and resolve equipment malfunctions, minimizing disruptions to critical healthcare operations.
- Conduct safety checks and compliance audits on printing devices to ensure adherence to healthcare industry standards and regulations.

PROJECTS & ACHIEVEMENTS:

Graduation Project: Agricultural Robot [Grade: Excellent]

- Contributed to the development of an agricultural robot designed for enhancing agricultural efficiency.
- Worked in the Electrical Department, focusing on integrating and optimizing electrical components for improved performance.
- Assisted in wiring, circuit design, and troubleshooting electrical issues to ensure the robot met project specifications.

College Project: Small Smart Garage

- Developed a small-scale smart garage project utilizing multiple sensors and motors.
- Designed and implemented the electrical system for automation and control.
- Collaborated with team members to test and refine the system for reliable operation.
- Using Arduino Mega, IF sensors, DC motors and LCD display.

College Project: Power Supply

- By using components like (Transformer, Regulators, Capacitors, Resistors, LEDs, Buttons).
- Developed a small circuit simulation with an app like (Proteus or Altium).
- Developed a system with ON/OFF control, temperature sensing, heating/cooling elements, and EEPROM storage.
- Implemented temperature display and control logic using ATmega32A microcontroller in Embedded C

SKILLS:

Hard Skills

- Programming Languages: Embedded C, C++, C#, Python, Java.
- Microcontrollers: ATmega32A, Arduino, STM32 (basic knowledge).
- Hardware: LM35, DS18B20, Peltier Cooling, 7-Segment Displays, EEPROM.
- Software Tools: Proteus, MATLAB, Multisim, Atmel Studio, Code Blocks, SDK, eXtreme Burner – AVR.

Soft Skills

- Good Communication skills
- Teamwork
- Time management
- Critical thinking

CERTIFICATIONS & COURSES:

- **Embedded System (AVR) diploma** | AMIT Learning Academy | August 2024
- **A2 English Course** | American Egyptian Academy | Jan 2024
- **Automotive Summer Training** | BETA | Jul 2023
- **Embedded System Training Course - 120 Hours** | Arab Tech Center | Sep 2021
- **Engine Mechanical Basic System** | GB Academy | Sep 2020

LANGUAGES:

- Arabic: C2
- English: B2
- French: A1
