### SUMMARY

Aspiring Software Engineer with a strong foundation in .NET, Angular, and SQL Server. Recent Computer Science graduate from Alexandria University, dedicated to developing efficient, scalable, and maintainable software solutions.

### EDUCATION

|                     |                                                                                                                                                                                                                                                                                 |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Oct 2024 – Dec 2024 | <b>Career180</b><br><i>Back-End Track</i> <ul style="list-style-type: none"><li>Completing a program in scalable server-side application development, mastering .NET, SQL, API design, and server management with a focus on security and performance optimization.</li></ul>   |
| May 2023 – Oct 2023 | <b>Route IT Training Center</b><br><i>Front-End Diploma</i> <ul style="list-style-type: none"><li>Gained expertise in Angular, HTML, CSS, JavaScript, TypeScript, Bootstrap, and jQuery to build responsive and dynamic web applications.</li></ul>                             |
| Nov 2023 – May 2023 | <b>Route IT Training Center</b><br><i>Back-End Diploma</i> <ul style="list-style-type: none"><li>Gained expertise in C#, ASP.NET <sup>🔗</sup>, SQL, Entity Framework, MVC, and RESTful API development, building a strong foundation for scalable back-end solutions.</li></ul> |
| 2020 – 2024         | <b>Faculty of Computers and Data Science Alexandria University</b><br><i>Bachelor Of Computer Science</i><br>Graduated with GPA: 3.56                                                                                                                                           |

### PROFESSIONAL EXPERIENCE

|                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Jan 2025 – present           | <b>Software Engineer</b><br><i>Pharos University, Alexandria</i> <sup>🔗</sup> <ul style="list-style-type: none"><li>Led the development of a distributed <b>Library Management System</b>, enabling multi-branch book tracking, penalties, borrowing, copying, and transferring with real-time status updates.</li><li>Design, develop, and maintain robust back-end solutions using .NET technologies.</li><li>Build and manage applications using the MVC architecture and API.</li></ul> |
| Oct 2024 – present<br>Remote | <b>Programming Instructor</b><br><i>Ischool, DEMI</i> <sup>🔗</sup> <ul style="list-style-type: none"><li>Teaching programming fundamentals to 20 middle school students with a weekly rating of 4.8.</li><li>Designed lessons fostering problem-solving and adapted to diverse learning styles.</li></ul>                                                                                                                                                                                   |

## TRAINING

---

### Natural Language Processing intern

*City of Scientific Research and Technological Applications SRTA-City*

- Utilized advanced NLP techniques to analyze 10,000+ text samples, achieving 92% sentiment detection accuracy,
- Contributed to developing scalable text analysis algorithms and language models.

---

## SKILLS

---

C#

ASP.NET MVC

ASP.NET Core

Entity Framework Core

Angular

HTML

CSS

JavaScript

TypeScript

Bootstrap

jQuery

Java

Python

Redis

API design

LINQ

SQL Server

RESTful API

Data Visualization

Agile

OOP

## PROJECTS

---

### Library Management System for Pharos University

*ASP.NET Core, Entity Framework, SQL Server*

- Built a multi-user library management system to handle book inventory, user roles, and transactions.
- Implemented modules for borrowing, copying, penalties, user restrictions, and inter-branch transfers.
- Applied clean architecture principles using Repository and Unit of Work patterns.
- Focused on scalability, data integrity, and secure access through JWT and role-based authorization.

### Senalyzer MVC Project

*Sentiment Analysis of Amazon Reviews*

- Engineered a high-performance sentiment analysis platform for Amazon reviews, leveraging machine learning to classify reviews with over 90% accuracy.
- Integrated Selenium for automated review scraping and built secure user authentication features using .NET MVC and Python.

### Talabat E-commerce API Project

*.Net Core, SQL server and Redis*

- Designed and implemented a scalable API replicating Talabat's core features.
- Integrated Redis for data caching, enhancing performance.

### FreshCart-Ecommerce

*HTML, CSS, Bootstrap, TypeScript, Angular.*

- Built an Angular-powered e-commerce platform with a catalog of over 500 products, integrating secure user authentication, shopping cart functionality, and seamless payment processing.
- Features include search, wishlist, and robust security measures to protect user data.
