

Zyad Abdellatif Elshewy

BI Engineer

Address: Cairo, Egypt | **Willing to Relocate**

Date of Birth: November 25, 2001 | **Military Status:** Exempted

Tel: +201113368899 | **Email:** zyadelshewy9@gmail.com | [LinkedIn](#) | [Portfolio](#)

Objective

Detail-oriented Data Analyst with expertise in SQL, Python, Power BI, Tableau, and Excel. Experienced in cleaning, analysing, and visualizing data to uncover insights that support business decision-making. Strong foundation in data warehousing and ETL processes, with a focus on improving reporting efficiency and driving data-driven strategies.

Education

Arab Academy for Science, Technology and Maritime Transport **Faculty of Computing and Information Technology**

Bachelor's in software engineering

Sep 2019 – Jun 2023 | Alexandria, Egypt

Experience

Data Intern

Abu Qir Fertilizers and Chemicals Industries Company | Summer 2023

- Supported data integration and analytics workflows, streamlining processes to enable 20% faster access to operational data.
- Applied critical thinking and attention to detail while assisting in transforming raw industrial data into structured, actionable reports for manufacturing operations.

Technical Skills

Languages: Python(Pandas), SQL, Java, JavaScript

Databases: MySQL, PostgreSQL

Cloud Platforms: AWS (RDS)

ETL Tools: Pentaho (PDI), SSIS

Data Visualization: Power BI, Tableau, Excel

Tools: Git, GitHub, pgAdmin, SSMS, MySQL Workbench

Core Skills: Data Cleaning, Transformation, ETL Pipelines, Data Warehousing, Data Modeling

Projects

Sales Data Warehousing

- Developed an ETL pipeline using Pentaho (PDI) to load sales data from CSV files into a PostgreSQL database, reducing manual data entry time by 40%.
- Designed a star schema to optimize query performance for reporting, improving dashboard loading times by 30%.

[GitHub](#)

Cafe Sales Dashboard

- Cleaned and transformed raw transactional data using SQL and Excel, increasing reporting accuracy by 25%.
- Built interactive Power BI dashboards, applying data storytelling skills to uncover peak sales periods and product performance insights.

[GitHub](#)

Restaurant Performance Analysis

- Analysed restaurant performance and customer behaviour data using SQL, identifying factors that increased customer retention by 10%.
- Created Power BI dashboards to visualize key metrics such as customer retention, peak hours, and sales growth.

[GitHub](#)

Layoffs Data Cleaning

- Cleaned and normalized public layoffs data using pure SQL queries, ensuring 100% consistency for future analytics.
- Structured the dataset for compatibility with future dashboards or reporting applications, improving analyst onboarding efficiency.
