🛡 Military Service: Completed(June 2023) 🏠 Hackerrank

SUMMARY

Motivated Software Engineer with a strong background in building back-end systems. Proficient in Java, C/C++, and Python, with good experience working in Linux environments. Eager to contribute to challenging software engineering and Tech projects and deliver high-quality solutions.

EDUCATION

BSc of Electrical Engineering - Cairo University - Grade: Good.

2016 - 2021

EXPERIENCE

SaaS Business Development & Sales Engineer, MEDOC Care

05/2025 - Present

- Generated qualified **B2B sales leads** and built strong sales pipelines for a Healthcare Management System as a **SaaS service**. Prospected new clients, scheduled product demos, nurtured relationships with key stakeholders, and collaborated with account executives to drive revenue growth, **achieving 100% sales growth** in the healthcare sector.
- Key related skills:** B2B lead generation, SaaS Sales, CRM Tools, Product demos & Presentation

Computer Science Instructor, almentor

06/2024 - present

- Lead sessions and develop lesson plans.
- Deliver general computer science concepts to students, especially Python programming. Also using different platforms for gamification and creating funny environments such as Scratch, Blockly, Pictoblox, and MIT App Inventor.

SKILLS

Programming Languages:: Java | C/C++ | Python.

Frameworks and Tools: Spring Boot | Spring MVC | Spring Security | JPA Hibernate | JDBC | Sockets | Maven

Other Technologies:: RESTful APIs | OOP | DB and SQL | Data Structure and Algorithm | SOLID Principles | Problem Solving | Git | JIRA | Linux Practitioner | Agile | Product Management | Product Owner | Business Development | BPMN | BRDs | SRSs.

PROJECTS

Registration System [🔗](#)

- A registration system using Java and the Spring Framework, designed to streamline user registration and management. The system includes secure authentication, user role management, and Email verification during user registration. Integrated with a PostgreSQL database for persistent storage, ensuring efficient data retrieval and management. Implemented RESTful API endpoints for seamless communication between the back-end and front-end components.
- Technologies used:** Java, Spring Boot, Spring Security, Java Mail Sender, PostgreSQL, RESTful APIs.

Employee Manager Application

- A Full-Stack web application that enables users to store employee data such as name, job title, and phone number, etc, using "MySQL" database. Also, I implemented RESTful APIs for communication between both Client and Server sides.
- Technologies used:** Java, TypeScript, Spring Framework, MySQL, RESTful APIs, AngularJS.

Chat Room App [🔗](#)

- Developed a multi-client chat room application using Java that demonstrates client-server communication and Java I/O networking concepts. Implemented the server using Java's ServerSocket to accept multiple client connections, while the client connects via Socket and communicates with the server through I/O streams. Utilized multi-threading to handle concurrent clients. Features include nickname customization and broadcasting messages to all connected clients.
- Technologies used:** Java, Java I/O, Networking, Multi-threading, Socket Programming
