

Summary

Detail-oriented software professional with a Bachelor's degree in Computer Science from Tanta University and extensive experience in customer support engineering, specifically with Microsoft Dynamics 365. Proven ability to diagnose and resolve complex technical issues, enhance operational efficiency, and guide clients in best practices for system implementation and integrations. Strong background in curriculum development and mentoring, fostering technology skills in diverse learners.

Professional Experience

Concentrix— *Customer Support Engineer (Dynamics 365 Commerce & Tech Integration)*
Jul 2024 – present

- Provided end-to-end support for Dynamics 365 Commerce modules including POS systems, e-commerce solutions, loyalty programs, and discount configurations.
- Diagnosed and resolved client-reported bugs and system errors, improving operational efficiency.
- Guided customers in best practices for implementing loyalty schemes, product catalog updates, and omnichannel integrations.
- Supported integration projects using OData services, Excel/Word plugins, Dual Write, and Microsoft Power Platform, ensuring smooth data synchronization across applications.
- Documented technical issues and fixes, contributing to the internal knowledge base.

Techy School — *Coding & Robotics Instructor*
Jan 2023 – Jan 2024

- Designed and delivered a structured robotics curriculum for students aged 5–17, covering Arduino, Scratch, LEGO WeDo, Spike Prime, EV3, Pictoblox, Python, HTML, and CSS.
- Developed hands-on lessons and interactive projects that improved students' problem-solving and critical thinking skills.
- Prepared and mentored teams for major competitions such as FIRST LEGO League (FLL), Intel ISEF, Robofest, Robocop Junior, and ORCE, with students winning and placing in local/regional stages.

- Mentored participants in Codeavour UAE, guiding them in innovation projects that combined coding and robotics with real-world applications.
- Collaborated with parents and school leadership to assess progress and recommend learning paths for advanced students.

iSchool — *Web Development Instructor*
Jul 2023 – Oct 2023

- Taught web development fundamentals to beginners, covering HTML, CSS, and JavaScript.
- Supported students in creating their first functional websites, focusing on layout, styling, interactivity, and responsiveness.
- Designed project-based learning modules where students built personal portfolio websites, simple games, and basic interactive apps.
- Provided one-on-one mentoring for students struggling with coding logic.

Roboto Academy — *Lego Robotics Instructor*
Nov 2021 – Feb 2022

- Conducted classes on LEGO WeDo, EV3, and Spike robotics kits for children and teens.
- Guided students in engineering problem-solving, such as building robots to perform specific tasks (line-following, obstacle avoidance, ball collection).
- Integrated STEM-based challenges into lessons, fostering teamwork, creativity, and technical thinking.
- Prepared students for robotics contests, encouraging application of learned skills in competitive settings.

Banque Misr — *Software Development Intern*
Jul 2022 – Sep 2022

- Contributed to backend web applications using Spring Boot framework and JavaScript.
- Built and tested API endpoints for internal banking services.
- Collaborated with senior engineers on debugging and troubleshooting code issues.
- Gained exposure to enterprise-level financial applications and learned best practices in secure coding.

Al Hayah Digital — *Backend Development Intern*
2022

- Designed and implemented SQL databases to support websites and mobile applications.
 - Assisted in backend logic development, ensuring clean data structures and efficient queries.
 - Participated in team discussions on system architecture, contributing to decision-making about database relationships and scalability.
 - Created technical documentation for database schemas and workflows.
-

Education

Bachelor's Degree in Computer Science
Tanta University, Faculty of Computer and Informatics

Technical Skills

- Programming & Web Development: Python, JavaScript, HTML, CSS, SQL, Spring Boot
- Robotics & STEM Tools: Arduino, LEGO WeDo, EV3, Spike Prime, Pictoblox, Scratch
- Microsoft Dynamics 365: POS, e-commerce, loyalty & discounts, system troubleshooting
- Integrations: OData, Excel/Word integration, Dual Write, Power Platform
- Other Skills: Curriculum development, student mentoring, technical documentation
