Summary

React Front-End Developer with hands-on experience building responsive, scalable web applications using React.js, JavaScript, TypeScript, and modern UI/UX principles. Proficient in creating component-based architectures and integrating REST APIs, acquired through structured training at the Digital Egypt Pioneers Initiative (DEPI). Skilled in Git and Vercel, with a focus on delivering user-friendly interfaces and optimized code.

Skills

- **Front-End Development:** React.js, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Material UI, React Router, Context API, Responsive Web Design, UI/UX Principles, Unit Testing
- **Back-End Development:** Node.js, Express, REST APIs
- **Tools & Technologies:** Git, GitHub, VS Code, Postman, Vercel, dotenv, React Testing Library

Experience

React Front-End Developer Trainee Digital Egypt Pioneers Initiative (DEPI), Egypt | 2024–2025

- Developed and deployed 3 responsive React.js web applications, optimizing UI load times by 20% through efficient component rendering and designing 10+ reusable components to reduce development time by 15%.
- Integrated REST APIs into 2 applications for real-time data updates supporting 100+ users, while collaborating on user-friendly UI/UX with Material UI and Bootstrap.
- Managed Git/GitHub for version control, ensuring seamless collaboration across 3+ team projects.

Innovation Training Participant

Innovegypt Program (ITIDA), Egypt | 2023

- Completed a 45-hour training program, developing a tech startup simulation project.

Technical Trainee Benha Electronics Company (Ministry of Military Production), Egypt | 2024

- Completed 120 hours of training, mastering 5+ software tools, enhancing problem-solving skills applicable to web development.

Projects

Real-Time ECG Monitoring System

- Developed a React.js dashboard for real-time ECG data visualization using WebSockets, Material UI, and React Router, achieving 95% data rendering accuracy for 50+ test cases.
- Optimized dashboard performance, reducing load time by 30% through efficient WebSocket integration and state management.
- Deployed on Vercel with Git/GitHub for version control: github.com/Helmyto/Real-Time-ECG-Monitoring-System.

Movie Recommendation Web App

- Built a React.js web app using the TMDB API, managing 1,000+ daily API calls for movie search and recommendations.
- Improved search performance by 40% through optimized Context API usage.
- Deployed on Vercel with Git/GitHub for version control: github.com/mohamednaderr/Movie-Recommendations.

Education

Bachelor of Engineering – Electrical Communications & Electronics

Tanta University, Egypt | Expected 2025

- Relevant Coursework: Digital Systems, Programming Fundamentals, Embedded Systems, Web Development.

Certifications & Achievements

- **React Front-End Development**, Digital Egypt Pioneers Initiative (DEPI)
- **TypeScript Fundamentals**, Mahara-Tech
- **Certificate of Acknowledgement**, 45-Hour ITIDA Innovation Training Program
