SUMMARY

Web Developer with hands-on experience building real-world web applications using C#, ASP.NET Core, and Angular.

EDUCATION

Information Technology Institute (ITI), MCIT

9 Month Diploma in Professional Development & Bi-infused CRM

10/2024 – 06/2025

Bachelor of Science in Pharmacy

Bachelor degree

09/2018 – 07/2023

EXPERIENCE

Software Intern

Pioneers Solutions - Egypt

10/2025 - present

- Built the E-Invoicing module, which is part of an ERP system, focusing on backend development using Asp .Net Core.

PROJECTS

EaseAid - Disability Support System

[live demo](#)

GitHub Repos: [API](#) – [Consumer](#)

06/2025 - 07/2025

- Built a complete support platform where 200+ users can sign up as patients or helpers, each with a custom dashboard and secure, role-based access.
- Integrated an AI chatbot to assist users with onboarding, FAQs, and service navigation.
- Real-time SignalR notifications alert users instantly about new service requests, status updates, and payment confirmations.
- Secured over 100+ transactions using Stripe for reliable, encrypted payment processing.
- Used JWT Authentication to ensure secure login, role-based authorization, and protected API communication.

Hotelier - Hotels Booking System

[live demo](#)

[GitHub Repo](#)

06/2025

- Developed a full-stack booking system supporting separate roles for admins and users.
- Integrated Stripe for secure online payments and Google login for a smooth sign-up process.
- Set up SMTP for sending automatic booking confirmation emails to users.

AttendEase - HR Management System

[live demo](#)

[GitHub Repo](#)

05/2025

- Developed a desktop application for managing 100+ employees and departments using WinForms, Dapper, and Entity Framework.
- Designed with 3-tier layered architecture to enhance maintainability and scalability.
- Enabled real-time notifications to improve in-system communication.
- Integrated QR code scanning for automated employee attendance tracking.

Shelfie - Library Management System API

[GitHub Repo](#)

05/2025

- Built a 100% RESTful API using ASP.NET Core Web API with a focus on scalability and performance.
- Integrated JWT authentication, role-based authorization, and input validation to ensure secure access control.

TECHNICAL SKILLS

.NET & Backend Development: C#, ASP.NET Core, ASP.NET MVC, LINQ, Entity Framework Core, WinForms, WPF, RESTful APIs, SQL Server

Frontend: HTML5 , CSS3 , SASS , Bootstrap 5 , JavaScript, TypeScript, Angular, jQuery

Design & Architecture: MVC Architecture, Clean Code, OOP, Design Patterns, SOLID Principles

Tools & Technologies: Visual Studio, Git, GitHub, Docker, MSSQL, MongoDB

Workflow & Methodologies: Agile (Scrum), API Documentation, Version Control

Core Concepts: Data Structures, Algorithms, Problem Solving
