Maadi, Cairo • +20 114 652 4380 • Ahmed99-007@hotmail.com • linkedin.com/in/ahmed-hazem-mh

Network engineer

Recent Computer Science graduate (2025) with a strong foundation in system administration, DevOps practices, and incident response. Proven experience in Linux environments, shell scripting, and infrastructure monitoring. Skilled in troubleshooting complex technical issues, automating routine tasks, and collaborating with cross-functional teams. Eager to leverage strong analytical skills and technical knowledge of SQL and Java ecosystems as an Application Support Engineer.

WORK EXPERIENCE

Digital Egypt Pioneers Initiative • Cairo • 05/2025 - 11/2025

SOC Analyst (Incident Response & Monitoring)

- Monitored enterprise systems and applications using SIEM tools to ensure high availability and security.
- Performed Root Cause Analysis (RCA) on system anomalies and incidents to prevent recurrence.
- Analyzed system logs to troubleshoot issues and identify performance bottlenecks.
- Collaborated with engineering teams to resolve escalated technical incidents effectively.
- Documented incident response procedures and maintained technical knowledge base.

Banque Misr • Remote/Hybrid • 01/2024 - 07/2024

DevOps Intern

- Managed Linux-based cloud infrastructure (AWS), focusing on stability and resource optimization.
- Developed Shell and Python scripts to automate routine deployment and maintenance tasks.
- Configured and maintained CI/CD pipelines using Jenkins, ensuring smooth application delivery.
- Utilized Docker and Kubernetes for container orchestration and application deployment.
- Troubleshoot build failures and deployment issues, reducing downtime for development teams.
- Administered AWS VPC networking, managing security groups and access controls.

EDUCATION

Bachelor of Computer Science: Software Engineering

Arab Open University • Cairo • GPA: 3.33 • 01/2021 - 01/2025

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) • 01/2024

NTI

Cisco CyberOps Associate • 01/2024

NTI

PROJECTS

Infrastructure Automation

- Designed and deployed automated infrastructure using Terraform and Ansible.
- Created Bash scripts to monitor server health and disk usage, alerting administrators of potential issues.

Enterprise Monitoring

- Implemented a monitoring dashboard to visualize system traffic and detect anomalies.

- Analyzed log patterns to improve incident detection and response times.

SKILLS

Operating Systems: Advanced command-line proficiency (grep, awk, sed, find, tar), Linux (Ubuntu/debian), Process management (ps, top, kill), Windows Server basics

Scripting & Langs: Bash/Shell Scripting, Java, Python, SQL (Oracle, MySQL)

Web & Middleware: Apache Tomcat, HTTP/HTTPS protocols, JBoss configuration and troubleshooting, SSL/TLS certificates handling

DevOps & Tools: Alert handling, Docker, Git/GitHub, Jenkins (CI/CD pipelines), Kubernetes, Log analysis, SIEM tools, Terraform

Networking: DHCP, DNS, Firewalls, TCP/IP, Troubleshooting network connectivity, VLANs

Languages: Arabic, English
