**Email:** Gerges.nafeh11@gmail.com

**LinkedIn:** <https://www.linkedin.com/in/gergesnafeh>

**Phone:** +201553439462

**Location:** Cairo, Ain Shams

**GitHub:** <https://github.com/GergesNafeh>

## Profile

---

Results-driven Data Engineer with a strong foundation in Big Data technologies (such as Hadoop and Spark), SQL, Excel, and data visualization tools like Power BI and Tableau. Skilled in transforming complex and large-scale datasets into actionable insights to support business decisions. Experienced in data cleaning, statistical analysis, and reporting. Passionate about leveraging data to drive efficiency and innovation.

## Experience

---

### Big Data -National Telecommunication Institute (NTI) 4 months |October 2025- Present

- Trained in Excel, SQL, Python, and Power BI for data analysis and visualization.
- Worked on real-world datasets to clean, analyses, and present insights.
- Gained practical experience about Big Data and Its tool like (spark, Kafka ,HBase , Sqoop).

### Data Analyst at Sabq Initiative |July 2025- Present

- Provided insights to improve engagement and guide awareness campaigns.
- Helped expand the organization's reach among students and graduates.
- Analyzed data to support Sabq's global outreach and scholarship programs.

## Education

---

**Bachelor of Computer Science & AI/** *Helwan University*  
With Grade : 3.28

## Projects

---

- **Call Center Analysis Dashboard:** Built an interactive Excel dashboard with pivot tables and KPIs (AHT, NPS, call volume, sentiment, SLA) to analyze multi-site call center performance and provide actionable insights for decision-making (**Excel, Power Query, Pivot Tables, Dax**).
- **Sales Analysis Using Pyspark:** Designed and executed an end-to-end PySpark project on Databricks to transform raw sales data, defining schemas and deriving time-series features for analysis. Calculated and visualized 9 critical KPIs, including sales trends (monthly, yearly, quarterly), top-selling products, customer spending, and order source performance. Delivered a dynamic dashboard providing immediate business insights into product performance and market trends. (**PySpark, Databricks, Data Wrangling**)
- **Real-Time Web Log Analytics System:** Built a streaming data processing pipeline to analyze web server logs in real-time using Kafka and Spark Structured Streaming. Implemented log parsing, error detection, and traffic monitoring to extract insights such as status code distribution and top requesting IPs. Enabled live visualization and CSV output storage for continuous monitoring and performance optimization. (**Kafka, Apache Spark, Python, Streaming ETL, Linux**)
- **Store sales Performance Dashboard:** Developed an interactive dashboard analyzing **10,000+** sales transactions across multiple regions. Created **15+** dynamic visuals and **10** DAX KPIs to monitor sales, profit, and discount trends. Delivered insights that improved profit margin visibility by **25%** and helped identify top **10** performing products and regions. (**Power BI, Power Query, DAX, Data Modeling**).

## Languages

---

- Arabic: Native
- English: Very Good (Speaking, Reading, Writing)

# Skills

---

## Data Manipulation & Processing

- **SQL (Structured Query Language)** – Query and manipulate databases (Joins, Aggregations, CTEs).
- **Excel / Google Sheets** – Advanced formulas, Pivot Tables, Data Validation, and Power query.
- **Pandas & NumPy (Python)** – Data cleaning, transformation, and numerical operations.
- **Big Data Ecosystem (Hive / HBase)** – Distributed processing, querying large datasets (e.g., Hive, Spark SQL), and ETL pipelines

## Data Cleaning & Wrangling

- **Big Data Databases (Hive / Impala)** – Querying petabytes of structured and semi-structured data stored in distributed file systems.
- **Data Normalization & Transformation** – Scaling, Encoding, Binning.
- **ETL (Extract, Transform, Load)** – Data pipeline processing for analysis like Sqoop and Kafka.

## Data Visualization & Reporting

- **Power BI & Tableau** – Build interactive dashboards and reports.
- **Excel Charts & Pivot Tables** – Quick visualization and reporting.
- Interactive data reports and dashboards using **Python Matplotlib**

## Programming & Scripting

- **Python** – Data manipulation (Pandas, NumPy), automation, machine learning.
- **SQL Server** – Efficiently extract & analyze data from databases.
- **Big Data Frameworks (PySpark)** – Writing scalable scripts for distributed data processing and large-scale data analysis.

## Soft Skills

- **Critical Thinking** – Identifying patterns, Data Storytelling and meaningful insights.
- **Communication** – Explaining technical results in simple terms.
- **Attention to Detail** – Avoiding errors in large datasets.
- **Collaboration** – Working with stakeholders like business managers and engineers.
- **Problem-Solving.**

# Courses

---

**Epsilon Data Analysis Course (Excel & Power BI & Tableau) – with Eng Karim Hossam** | March 2025-September 2025

**Eyouth BI and Data Analysis Course** | June 2025-August 2025.

**Excel basics for data analysis by IBM** - Coursera | May 2023

IBM's Excel Basics for Data Analysis teaches essential Excel skills for organizing, analysing, and visualizing data. It supports learners in applying data analysis across business, marketing, and research fields.

**Pyspark for Data Engineering** – DataCamp | November 2025-December 2025

Learned filtering, joining, aggregating data across multiple tables.

**Sql for Data Engineering** – DataCamp | October 2025-October 2025

Learned filtering, joining, aggregating data across multiple tables.

**Data Analyst Career Track – Alex the Analyst | April 2025- September 2025**

Self-paced training covering Excel, SQL, Power BI, and Python. Focused on core data analysis skills, project-based learning, and real-world business problem solving.

**Data Analysis** – Coursera | March 2023-August 2023

Gained hands-on experience building dashboards, visualizations, and using DAX.
