8. Al-Iraqia Al-Wataniya – Government Import & Export Company

Implemented and customized several Odoo modules, including:

Accounting: Set up chart of accounts, configured invoicing, managed customer and vendor records, and integrated financial operations with other modules.

Inventory: Handled stock management, incoming and outgoing shipments, and inventory adjustments.

Purchasing: Managed the procurement cycle from purchase requisitions to purchase orders and vendor bills.

Logistics: Organized logistical workflows and ensured smooth coordination with inventory and procurement operations.

Data Migration: Prepared, cleaned, and imported master data (products, accounts, customers, vendors) into the Odoo system.

Collaborated with different departments to gather requirements and translate them into practical Odoo solutions.

Trained end-users and ensured proper system adoption.

9- Mazaj Company – Baghdad, Iraq

Odoo ERP Implementation Consultant

- Conducted comprehensive system analysis across multiple Odoo modules including Accounting, Sales, Purchases, Inventory, and Logistics.
- Implemented end-to-end ERP workflows to support the company's import/export operations with international suppliers.
- Delivered hands-on training sessions to staff on effective system usage and daily operations.
- Successfully addressed the challenge of fluctuating exchange rates by implementing a solution to dynamically link each transaction with its applicable exchange rate.

10- Al-Joud Factory for Chemicals and Pharmaceuticals in Iraq

Odoo ERP Financial Implementation & Manufacturing Support

- Collaborated with the internal team to support and enhance the manufacturing process within Odoo.
- Led the implementation and delivery of the full financial module, including Accounting, Expenses, and Financial Analysis.
- Provided comprehensive training for the finance team, transforming theoretical understanding into practical system application.
- Migrated data from the legacy system, including uploading opening balances and

transferring all financial transactions from January to May 2025 in preparation for go-live.

11- Jawharat Al-Ain – Wholesale & Retail Company

Odoo ERP Implementation Consultant

- Implemented and configured multiple Odoo modules including Accounting, Inventory, Purchases, Sales, and Expenses.
- Designed and supported a custom light manufacturing process focused on product bundling and packaging for institutional sales.
- Delivered full training for staff across all modules, enabling smooth day-to-day system operation with minimal issues.
- Currently providing ongoing support and maintenance for the implemented solution.

12-Agyal Baghdad Company – Basra (Iraq)

A commercial company with four branches.

I was responsible for the full implementation of the Odoo system across all departments of the company. The scope of work included the following modules:

- **Sales Module:**
 - Configured products, price lists, and customer records.
 - Set up sales teams and defined workflows for quotations, sales orders, and invoicing.
 - Customized reports and templates as per business needs.
- **Purchases Module:**
 - Created supplier profiles and managed vendor pricelists.
 - Configured the purchase workflow from request for quotation (RFQ) to purchase orders and vendor bills.
 - Linked purchases to stock and accounting for full traceability.
- **Inventory (Stock) Module:**
 - Structured the warehouses and stock locations for all four branches.
 - Set up product categories, internal transfers, and reordering rules.
 - Managed incoming shipments and delivery orders efficiently.
- **Expenses Module:**
 - Created custom expense categories and approval workflows.
 - Enabled employee expense recording and integration with accounting.
 - Trained staff to record and manage company expenditures correctly.
- **Accounting Module:**
 - Configured the chart of accounts according to Iraqi standards.
 - Set up journal entries, tax configurations, and fiscal years.
 - Handled daily transactions, bank reconciliations, and financial reporting.
- **Employee Training:**
 - Delivered comprehensive training sessions for staff in all departments.
 - Ensured that users could work independently on the system.
 - Provided post-implementation support to resolve issues and optimize system usage.
